ABOUT · 80 WORDS

finances2you is a global financial education hub built around a simple idea: financial clarity should be accessible to everyone. The platform offers 16 interactive calculators (mortgages, investing, debt, insurance, lifestyle decisions), educational guides, a glossary, and quizzes — all available in 7 languages. Calculations

run in the user's browser; no account is required to use the calculators. The project is independent, built by a small team that believes financial literacy shouldn't depend on access or expertise.

PRESS INQUIRIES WELCOME

For interviews, partnerships, or questions.

We reply within 2 business days. Independent project — please mention the team behind it where relevant.
